Belastbare Holz- und Steindekore Resilient Wood and Stone Decors

Windmüller has added Wineo 1200 to its Purline organic flooring collection, which is manufactured without chlorine additives, softeners or solvents. The large-format wood and stone decors in XL and XXL formats

are suitable for heavy-duty environments in any setting. A semi-rigid variant in usage class 33 can be clicked in. According to the manufacturer, both the Multi-Layer with HDF coreboard and the Semi-Rigid with a con-

struction height of just five millimetres can be laid over existing subfloors during renovation work without any unevenness becoming apparent. The polyurethane surface makes the floors hard-wearing and at the same time elastic, which reduces the walking noise in the room. With an underlay mat, noise is additionally muffled.
